

**Scarlet Rose** is the third most popular ASBP variety grown in Queensland and WA

**Scarlet Rose** is well suited to commercial production across all sub-tropical growing regions: Bundaberg, Sunshine Coast and Greater Brisbane

It also performs well in Mediterranean regions around Perth, Western Australia

### PERFORMANCE

This variety has a higher early-season and total-season yield, and larger average fruit size than Red Rhapsody. The variety has a superior taste.

### GROWTH HABIT

Fruit shape of Scarlet Rose is conic to long conic, with slightly lighter external colour than Red Rhapsody

### GROWING NOTES

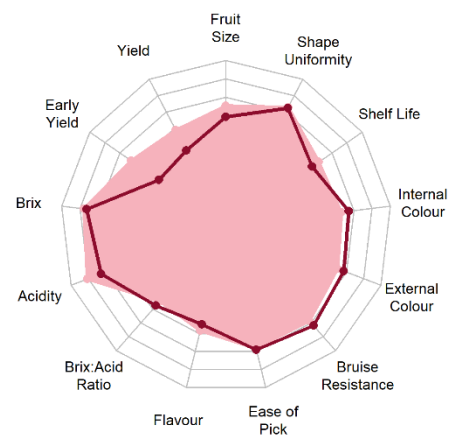

- It is increasingly being planted by Commercial fruit producers, because of its appearance and flavour
- It has good shelf life
- It is important to run a good disease management program with this variety
- Scarlet Rose is worth testing in tunnel systems
- **Do not overfertilise this variety**

*This information has been collated and provided by Australasian Plant Genetics based on feedback from growers and is for information only.*

### VARIETY CHARACTERISTICS

Radars chart comparing Scarlet Rose-ASBP (pink polygon) with Red Rhapsody (red line). The centre of the plot represents the lowest value for each trait, and the outside line of the plot represents the highest value for that trait from our trials.

### PEST & DISEASE RESISTANCE

	TOLERANT	MODERATELY TOLERANT	MODERATELY SUSCEPTIBLE	SUSCEPTIBLE	UNKNOWN
Charcoal rot					
Colletotrichum crown rot					
Fusarium wilt					
Powdery mildew					

#### Availability

This variety has Protection under the Australian Plant Breeders' Rights Act (PBR Act) and has been sub-licensed to Authorised Propagators for plug plant and runner production. A Royalty Fee is included in the runner purchase price and the Commercial fruit producer will be required to sign a Non-Propagation agreement before accepting delivery of runners.
