

Stella-ASBP is a new subtropical variety from the Australian Strawberry Breeding Program (ASBP)

Stella-ASBP is well suited to commercial production across all subtropical growing regions: Bundaberg, Sunshine Coast and Greater Brisbane.

Stella-ASBP may also perform well in Mediterranean regions around Perth, Western Australia.

PERFORMANCE

This variety is early-yielding, with higher total yield and larger average fruit size than Red Rhapsody. Flavour and shelf life are excellent.

GROWTH HABIT

Stella-ASBP plants are small to medium in size, sturdy, with a spreading habit.

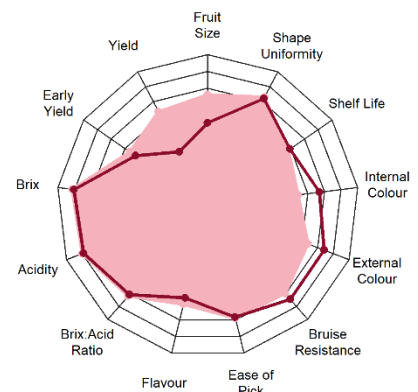

GROWING NOTES

None available yet

VARIETY CHARACTERISTICS

Radial chart comparing Stella-ASBP (pink polygon) with Red Rhapsody (red line). The centre of the plot represents the lowest value for each trait, and the outside line represents the highest value.

PEST & DISEASE RESISTANCE

	TOLERANT	MODERATELY TOLERANT	MODERATELY SUSCEPTIBLE	SUSCEPTIBLE	UNKNOWN
Charcoal rot					
Colletotrichum crown rot					
Fusarium wilt					
Powdery mildew					
Red Leaf Disorder					

Availability

This variety has Protection under the Australian Plant Breeders' Rights Act (PBR Act) and has been sub-licensed to Authorised Propagators for plug plant and runner production. A Royalty Fee is included in the runner purchase price and the Commercial fruit producer will be required to sign a Non-Propagation agreement before accepting delivery of runners.
