

Sundrench has a slightly higher early-season yield and a higher flavour rating compared to Red Rhapsody

Sundrench is well suited to commercial production across all sub-tropical growing regions: Bundaberg, Sunshine Coast and Greater Brisbane

PERFORMANCE

- This variety has a slightly higher early-season yield and a higher flavour rating compared to Red Rhapsody
- Resistance to bruising and ease of pick are similar to Red Rhapsody
- Sundrench has a marginally better shelf life
- It has good tolerance to Colletotrichum crown rot

GROWTH HABIT

Sundrench has a small to medium plant size with a sparse and spreading habit

GROWING NOTES

- This underrated but highly productive variety is the second most popular variety grown from the ASBP and is planted in Queensland and WA
- It should be planted in mid-March
- It requires high-level nutrition from early on to ensure maximum performance, with nitrates being preferred
- Use trace elements and ensure good calcium uptake
- Sundrench fruit are slightly more susceptible to bruising than Red Rhapsody
- More labour is required when Sundrench comes into full production, due to large quantities of fruit being harvested
- Sundrench blocks are usually finished by the end of August in Queensland

This information has been collated and provided by Australasian Plant Genetics based on feedback from growers and is for information only.

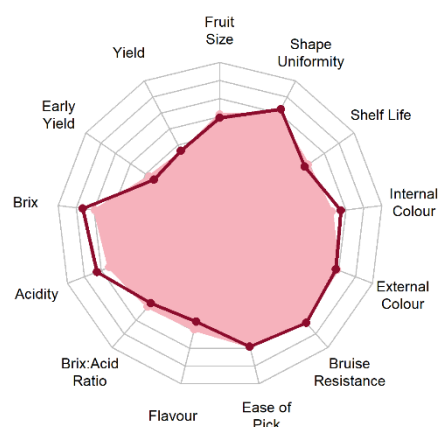

PEST & DISEASE RESISTANCE

	TOLERANT	MODERATELY TOLERANT	MODERATELY SUSCEPTIBLE	SUSCEPTIBLE	UNKNOWN
Charcoal rot					
Colletotrichum crown rot					
Fusarium wilt					
Powdery mildew					

VARIETY CHARACTERISTICS

Radars chart comparing Sundrench-ASBP (pink polygon) with Red Rhapsody (red line). The centre of the plot represents the lowest value for each trait, and the outside line of the plot represents the highest value for that trait from our trials.

Availability

This variety has Protection under the Australian Plant Breeders' Rights Act (PBR Act) and has been sub-licensed to Authorised Propagators for plug plant and runner production. A Royalty Fee is included in the runner purchase price and the Commercial fruit producer will be required to sign a Non-Propagation agreement before accepting delivery of runners.
